## Professional Summary

Software developer with four years of enterprise IT experience and a strong foundation in application development, testing, and troubleshooting. Skilled at solving technical problems and collaborating across teams, with career interests in software development and cybersecurity.

## Technical Skills

- **Languages:** C#, Python, Java, JavaScript, HTML, CSS, SQL
- **Frameworks:** Django, React, Spring Boot
- **Databases:** PostgreSQL
- **Developer Tools:** Git, GitHub, VS Code, IntelliJ IDEA
- **Web Technologies:** Responsive Web Design, REST APIs
- **Concepts:** Object-Oriented Programming (OOP), CRUD Operations, Unit Testing, Debugging

## Projects

### **Minesweeper Application**

Python, SQLite

- Developed and tested a Minesweeper application using Python and SQLite, implementing game logic and data storage while debugging and documenting defects to improve reliability.

## Experience

### **Software Developer Trainee**, Base Camp Coding Academy

Water Valley, MS | May 2026 – May 2027

- Developed and debugged full-stack web applications using Python, Django, JavaScript, HTML, CSS, and SQL while collaborating through GitHub workflows and presenting technical solutions to diverse stakeholders.

### **IT Specialist**, HCL - Olin Winchester

Oxford, MS | January 2021 - March 2025

- Diagnosed and resolved enterprise hardware, software, Windows, and account issues while managing support tickets, documenting solutions, and collaborating across teams to minimize downtime and meet service-level expectations.

### **Extern**, The Danse

Memphis, TN | August 2018 - December 2018

- Developed and enhanced C# application features while performing quality assurance testing, documenting defects, and collaborating with developers to improve software functionality and reliability.

### **Research Assistant**, Rhodes College

Memphis, TN | Summers 2017 and 2018

- Developed C# research software for virtual reality perception studies and collaborated with faculty to evaluate VR locomotion techniques, contributing to peer-reviewed research published at the ACM Symposium on Applied Perception (2018): *Evaluating the Effects of Four VR Locomotion Methods: Joystick, Arm-Cycling, Point-Tugging, and Teleporting*, Proc. 15th ACM Symp. Applied Perception (2018) (with B. Williams-Sanders, N. Coomer and W. Clinton)

## Education

Bachelor of Science (Computer Science), Rhodes College, May 2019
